90cm sink cabinet

Bowl depth: 165 mm

Stainless steel

Stainless steel integrates beautifully in any kitchen environment - better than almost any other material. Its main properties:

- Classic, timeless aesthetics
- Rustproof
- Completely heat resistant
- Suitable for food use and hygienic
- Stain and acid resistant
- Non-fading
- Easy to care for

BLANCO uses only highest quality stainless steel of alloy grade 18/10 (DIN 1.4301) this means with roughly 18% chromium and around 10% nickel, to satisfy the highest possible standards.

Conventional stainless steel sinks are cleaned with standard commercial products and polished occasionally with a special product for stainless steel.

Raised tap ledge: Easier cleaning around the tap. Less water marks and dirt around the tap, reduced risk of leakage.

Fixing clips: Providing extra stability with its steel cage and firm grip under the hardest worktop materials from 28-40 mm.

Large bowl sizes of the TIPO sink range make full use of corners for trouble-free storage and cleaning of bulky utensils.
